Profile

Full Stack developer specialized in WordPress and single-page applications. I have developed a wide range of websites using the latest trends and frameworks. Skilled at writing efficient, scalable, and maintainable code using current best practices.

Over the last 4 years, I've been leading the architecture and development of the corporate website of Network Rail, implementing new features and functionalities to enhance the user experience.

Currently improving my skills focusing mainly on Node.js and React.

Experience

Full Stack Web Developer

Network Rail - Full time
